

Bib Nose Type Pressure Regulating Valve

ITEM CODE: NFF-112

Description

- Pressure Reducing Valve has been designed to meet the needs of modern fire protection technology.
- It enables a uniform fire fighting pressure to be maintained at any hydrant in a fire protection system irrespective of its location.
- Efficient pressure control is not affected by differences in inlet pressure which may occur at varying flow levels.
- Expensive relief piping systems are completely eliminated, thus dramatically reducing installation costs.
- The regulator can be quickly and easily adjusted in-situ to meet individual floor level pressure requirements.
